2020

Solution provided to **Army for Communication System**, reviewed by Lt. General and Army officials

2022

**Social Impact Creator Award** At Bombay Stock Exchange in April 2022

20<sup>th</sup> century hearing loss was primarily related to elders. But in 21<sup>st</sup> century, **young adults are facing serious hearing damage & loss, due to increased audio consumption.**

Nearly **50% young adults aged 12-35<sup>1</sup>** in many countries - Exposed to unsafe sound levels from personal audio devices

**1+ billion** young adults<sup>2</sup> Avoidable hearing loss due to unsafe listening practices

**2.5 billion<sup>2</sup> people** will suffer from some degree of hearing loss by 2050.

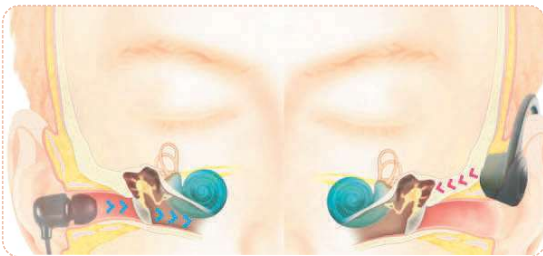

With advent of 4G, and new lifestyle restrictions due to COVID-19, video and **audio consumption has increased by 2000%.**

Eachone has been experiencing **ear pain and hearing loss, witnessing an increase of almost 40% in the last two years.**

1. World Health Organisation, Dept. for Management of NCDs, Disability, Violence and Injury Prevention (NVI) - Make Listening Safe

2. World Health Organisation, Deafness and Hearing Loss, April 1, 2021

The message is **'loud and clear'**. **Ear health is not an option.**

**WeHear OX is open ear, wireless audio device**, with bone conduction technology that bypasses physical ears, delivering sound through cheekbones.

**A technology used by military and defense**

## Whatever you do, 'WeHear' you!

### Athletes

- Run, cycle, exercise - with surroundings' awareness
- Ergonomic design - flexibility, comfort, solid grip to keep device from falling off
- Improved ear hygiene - no sweat accumulation leads to infection-free ears

### Professionals

- Avoid ear damage - caused due to hours of online meetings & calls
- Increase productivity dual device connectivity up to 30 ft.
- Communicate without barriers - live chat in 72 languages with in-built translator

### Kids

- Safeguard kid's ears. Protect from ear damage caused by prolonged hours of online education

### Gamers & Bingewatchers

- Comfortable grip ensures a very comfortable use. Keep your ears safe even if you are binge watching for long hours!
- Bone conduction vibrations helps you give new dimension to gaming experience.
- Easy fit shape ensures comfort even if you rest your neck on chair or pillow or watch in sleeping position.

## Why WeHear OX vs others?

	WEHEAR OX 	Headphones/Earphones 
Give your <b>ear health</b> a priority	No Ear Damage even after prolonged usage duration Ear canal is not blocked - more hygienic, avoids any infection	Listing at loud sound levels - harms eardrum in long run - leading to hearing damage Ear canal in constant touch with foreign object - increases infection chances
Liberate your ears, and <b>be safe</b>	Open ears - you can hear sounds of outside world, avoids potential accidents	Vacuum created through plug-in earphones - poses safety risk as ambient sounds not heard
Be free of pain, and listen comfortably	Simply sticks to your cheekbones - light-weight design helps in comfortable hearing	Pushing earphones into the ear to prevent them from falling - leads to ear pain
Sweat and moisture resistant	Free from mesh holes - IPX-6 level repels sweat, water splashes	Sweat, water splashes gradually corrode earphones' silicone - may damage functioning of headset
